

<b>Requirement Date:</b>	06/05/2022	<b>Requirement Type:</b>	New Request	<b>Est. Hrs</b>	
<b>Task</b>	Need to Add Notification Module in the System				
<b>Requirement:</b>	<p>Need a System / Module / Process, where Login User can Add Task / Notification from their Dashboard for future reference. Task / Notification can also be shared to other users for View Only.</p> <p>Owner user can able to update / delete / complete the Task.</p> <p>This Notification can be viewed in Calendar on Dashboard.</p>				
<b>Solution:</b>	<ol style="list-style-type: none"> <li>1. Button "Add Notification" will be provided on Dashboard.</li> <li>2. Clicking on the Button will open modal form.</li> <li>3. User will enter Notify Date, Title, Guest User and Description.</li> <li>4. Task will be displayed on Calendar at Notify date for owner of Task and Guest Users defined.</li> <li>5. Calendar needs to be created on Dashboard.</li> <li>6. On clicking the Task, owner can able to update / delete / complete the Task.</li> </ol>
